

Fellow Metro Rotarians:

I hope this letter finds you well. As we enter Rotary Water and Sanitation Month, I want to express our collective commitment to addressing the critical issues surrounding access to clean water and sanitation.

Rotary International has long been at the forefront of initiatives that aim to improve water and sanitation conditions globally. When people have access to clean water and sanitation, waterborne diseases decrease, children stay healthier and attend school more regularly, and mothers can spend less time carrying water and more time helping their families.

While the Rotary Global water projects may seem out of reach. One way you can contribute locally is by participating in our Adopt-A-Spot volunteer opportunity that will begin in April. This is a wonderful way to help clean up our local area and spend time with fellow Rotarians.

Thank you for your unwavering dedication to Rotary's principles and let us make Rotary Water and Sanitation Month a resounding success.

Yours in Rotary service,

*President Laura Kogut*
